PROFESSIONAL SUMMARY

Cybersecurity intern with hands-on SOC and detection-engineering experience across SIEM, EDR, and file-integrity monitoring, built at the National Centre for Cyber Security (NED). Skilled in threat detection, log correlation, and endpoint security across Linux and Windows environments. Computer Science graduate seeking to bring strong technical fundamentals to a SOC/Threat Detection role.

CORE COMPETENCIES

- Security: SIEM, DFIR, FIM, Log Analysis, Threat detection, Endpoint Detection, Secure System Administration, Network Security, Cryptography.
- Networking: VPNs, Routing & Switching, Firewall, Linux Networking, TCP/IP.
- Tools: Wazuh, Velociraptor, WireGuard, Wireshark, Burp Suite, Metasploit, Nmap, Cisco Packet Tracer.
- Languages: Python, Bash, C++, C#
- Platforms: Ubuntu Linux, Windows, VMware Workstation

EXPERIENCE

National Centre for Cyber Security (NCCS-NED)
Cybersecurity Intern

PROJECTS

- [FALYS – Real-Time File Integrity Monitoring Platform](#): Co-architected and shipped a 5-stage file-integrity monitoring platform (context collection, rule-based scoring, behavioral baselining, correlation, confidence classification) for Windows and Linux endpoints; self-installing agents secured via HTTPS with a live real-time alert dashboard.
- [WireGuard VPN Server](#): Built isolated self-hosted VPN with security hardening and terminal dashboard.

Deployed [Wazuh SIEM](#) proof-of-concept; onboarded Linux endpoint and monitored logs. Simulated Shellshock (CVE-2014-6271); validated detection via alerts and threat hunting. Deployed [Velociraptor](#) across Windows endpoints; executed VQL hunts and collected forensic artefacts. Simulated PowerShell obfuscation, persistence and registry Run-key techniques. Integrated [SocTalk](#) with Wazuh SIEM using Docker and MCP, validating end-to-end automated alert triage, investigation workflows, and human-in-the-loop review.

EDUCATION

BS Computer Science, Sir Syed University of Engineering & Technology
Graduated: 2026 | CGPA: 3.81

CERTIFICATIONS

- PITP Cybersecurity & Ethical Hacking (NED)
- Cisco CCNA: Introduction to Networks
